Butter Blade

The ideal tool for everyday meals, as well as cooking, baking and entertaining, the Microplane® Butter Blade is smartly engineered with a uniquely designed and shaped blade that makes using butter blissfully easy. The topside of the Butter Blade cleanly slices pats of butter and easily cuts through paper wrapping with printed measurements for accurate cooking and baking. The bottom side of the Butter Blade features three rows of tiny holes that when pulled across a stick of butter, create soft strands that warm up rapidly to flawlessly spread on soft breads, toast, muffins, scones, corn on the cob, and more. The rounded tip has an ingeniously crafted, hollow semi-circle to instantly create attractive curls by simply pulling the tip across a stick of butter.

Features:

- Cleanly slices pats of butter and cuts through paper wrapping
- Creates soft strands and attractive curls of butter for effortless spreading
- Ideal for cream cheese as well
- Dishwasher safe
- Reusable cover to protect the blade in storage
